## MY GOD WILL MEET ALL MY NEEDS

Base Verse: Acts 22:10 NLT

In Acts 22, Paul, formerly Saul, is attacked by a mob in Jerusalem and arrested for preaching about Jesus. As he was being taken to safety, he talked to the crowd in a way they could understand. He told them about his past, when he used to hurt people who believed in Jesus. Paul tells the story of how he changed on the road to Damascus. There, Jesus made him blind and asked him to stop doing bad things and follow Him. Paul had the choice to ignore Jesus, but he decided to listen. This choice changed his life completely. The story shows how God understands what we need and offers us salvation, guidance and love.

### FIND SOMETHING IN COMMON WITH EVERYONE...

Finding common ground and sharing our story helps others see we're not so different. Paul spoke in a way people could understand and showed how he changed, helping others believe they can change too. Sharing our story builds trust and makes it easier for others to listen and follow the right path.

#### ACTIVITY:

Did you  
know?

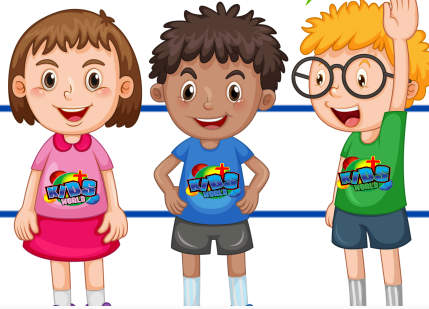

Sharing the story of when you decided to be a follower of Jesus is called your **TESTIMONY!**

What happens when you find common ground with other people?

How can I trust that God knows what I need, even when I don't understand it?

Who was the last person you shared your testimony with?

## GOD KNOWS WHAT WE NEED

Paul had the chance to ignore Jesus, but he chose to listen, and it changed his life forever! This story shows that God understands what we need and offers us love, guidance, and a way to be saved. Even when Paul didn't know it, God had a special plan for him. Sometimes, we may not know what we need, but God does, and He is always working in our lives to help us grow.

## LET'S TALK ABOUT IT

Imagine a picture of you and God walking together. What do you think God is teaching you right now?

What situation are you going through right now that might be teaching you something you need?

Is God helping you grow in any way?

How can you listen to God like Paul did?
